**⚠ WARNING – USER RESPONSIBILITY**

**FAILURE OR IMPROPER SELECTION OR IMPROPER USE OF THE PRODUCTS DESCRIBED HEREIN OR RELATED ITEMS CAN CAUSE DEATH, PERSONAL INJURY AND PROPERTY DAMAGE.**

This document and other information from Parker-Hannifin Corporation, its subsidiaries and authorized distributors provide product or system options for further investigation by users having technical expertise.

The user, through its own analysis and testing, is solely responsible for making the final selection of the system and components and assuring that all performance, endurance, maintenance, safety and warning requirements of the application are met. The user must analyze all aspects of the application, follow applicable industry standards, and follow the information concerning the product in the current product catalog and in any other materials provided from Parker or its subsidiaries or authorized distributors.

To the extent that Parker or its subsidiaries or authorized distributors provide component or system options based upon data or specifications provided by the user, the user is responsible for determining that such data and specifications are suitable and sufficient for all applications and reasonably foreseeable uses of the components or systems.

**Offer of Sale**

The items described in this document are hereby offered for sale by Parker-Hannifin Corporation, its subsidiaries or its authorized distributors. This offer and its acceptance are governed by the provisions stated in the detailed "Offer of Sale" elsewhere in this document or available at [www.parker.com/ipdus](http://www.parker.com/ipdus).

© Copyright 2010 Parker Hannifin Corporation. All Rights Reserved.

## Introduction

Parker C Series Check Valves are designed for uni-directional flow control of fluids and gases in industries such as chemical processing, oil and gas production and transmission, pharmaceutical, pulp and paper, power and utilities.

## Features

- ▶ Resilient, custom molded, blow-out resistant seat design
- ▶ Back stopped poppet minimizes spring stress
- ▶ 100% factory tested for both crack and reseal
- ▶ Cracking pressures include: 1/3, 1, 5, 10, 25, 50, 75, and 100 psi.
- ▶ Port connections include male and female NPT, CPI™, A-LOK®, UltraSeal, VacuSeal, BSP, SAE and Seal-Lok®
- ▶ Heat code traceability

Model Shown: 4V-C4L-5-SS

## Specifications

### Pressure Rating:\*\*

316 SS – 1/8" to 3/4": .....6000 psig (414 bar) CWP  
 1": .....5000 psig (345 bar) CWP  
 PTFE Seats, all sizes: .....4000 psig (276 bar) CWP  
 Brass – 1/8" to 1": .....3000 psig (207 bar) CWP

### Temperature Rating:

Fluorocarbon Rubber..... -15°F to +400°F (-26°C to +204°C)  
 Nitrile ..... -30°F to +275°F (-34°C to +135°C)  
 Ethylene Propylene Rubber.. -70°F to +275°F (-57°C to +135°C)  
 Neoprene Rubber ..... -45°F to +250°F (-43°C to +121°C)  
 PTFE ..... -65°F to +400°F (-54°C to +204°C)  
 Highly Fluorinated Fluorocarbon Rubber  
 ..... -15°F to +200°F (-26°C to +93°C)

Orifice: .....078" to .656" (2.0 mm to 16.7 mm)

C<sub>v</sub>: ..... .18 to 6.56

## Materials of Construction

Item #	Part Description	Stainless Steel	Brass
1	Cap	ASTM A 276, Type 316	ASTM B 16, Alloy C36000
2	Seat*	Fluorocarbon Rubber*	
3	Poppet	ASTM A 479, Type 316	ASTM B 16, Alloy C36000
4	Spring	316 Stainless Steel	
5	Body	ASTM A 276, Type 316	ASTM B 16, Alloy C36000

\* Optional seat materials are available. See How to Order section.  
 Lubrication: Perfluorinated Polyether.

**Note:** PTFE seated valves employ an additional PTFE coated 316 SS gasket between the seat and the body and are distinguishable from elastomeric seated valves by the gap designed between the body and cap.

\*\*See Pressure Rating note on page 4.

## Flow Calculations with 1000 psig (69 bar) Inlet Pressure

Valve Series	Maximum C <sub>v</sub>	Pressure Drop ΔP		Water @ 60°F (16°C)		Air @ 60°F (16°C)	
		psig	bar	gpm	m <sup>3</sup> /hr	SCFM	m <sup>3</sup> /hr
C2	0.31	10	0.7	1.0	0.2	30.8	52.1
		50	3.4	2.2	0.5	67.2	112.8
		100	6.9	3.1	0.7	92.0	155.3
C4	0.75	10	0.7	2.4	0.5	74.6	126.1
		50	3.4	5.3	1.2	162.7	273.0
		100	6.9	7.5	1.7	222.8	376.2
C6	2.26	10	0.7	7.1	1.6	225.3	380.9
		50	3.4	16.0	3.6	495.2	831.0
		100	6.9	22.6	5.1	685.1	1157.2
C8	3.53	10	0.7	11.2	2.5	352.0	595.0
		50	3.4	25.0	5.6	774.3	1299.4
		100	6.9	35.3	8.0	1072.4	1811.6
C12	6.01	10	0.7	19.0	4.3	596.6	1008.3
		50	3.4	42.5	9.6	1287.5	2160.4
		100	6.9	60.1	13.7	1738.5	2934.5
C16	6.56	10	0.7	20.7	4.7	648.9	1096.6
		50	3.4	46.4	10.5	1379.4	2314.7
		100	6.9	65.6	14.9	1824.4	3077.6

## Crack and Re-Seal Performance

Check Valve Rated Crack Pressure		Minimum Acceptable Crack Pressure		Maximum Acceptable Crack Pressure		Maximum Re-seal Back Pressure	
psig	bar	psig	bar	psig	bar	psig	bar
1/3	0.02	0	0.00	1	0.07	4	0.28
1	0.07	0	0.00	3	0.21	4	0.28
5	0.34	3	0.21	8	0.55	3 BCP	0.21 BCP
10	0.69	7	0.48	13	0.90	3 BCP	0.21 BCP
25	1.72	20	1.38	30	2.07	4 BCP	0.28 BCP
50	3.45	40	2.76	60	4.14	5 BCP	0.34 BCP
75	5.17	60	4.14	90	6.21	7 BCP	0.48 BCP
100	6.89	80	5.52	120	8.27	10 BCP	0.69 BCP

BCP means "Below Cracking Pressure."

Cracking pressure is defined as the upstream pressure at which a detectable flow is measured.

Re-seal pressure is defined as the downstream pressure at which the check valve closes bubble-tight.

**Example:** For a valve with a spring having a rated cracking pressure of 25 psig (1.72 bar), the actual cracking pressure ranges between 20 and 30 psig (1.38 and 2.07 bar). The re-seal pressure range would be 16 to 20 psig (1.10 to 1.38 bar). Check valves having springs with rated crack pressures of 3 psig (0.21 bar) or less may require up to 4 psig (0.28 bar) back pressure to re-seal bubble-tight.

**Note:** Check valves which are not actuated for a period of time may initially crack at higher than the above crack pressure ranges.

PTFE seated valves require a minimum back pressure of 100 psig (6.9 bar) to insure a leak-tight re-seal.

## Pressure vs. Temperature

**Note:** To determine MPa, multiply bar by 0.1

Nitrile Seat

Neoprene Seat

Fluorocarbon Seat

Ethylene Propylene Seat

## Flow Data/Dimensions

C

**Model Shown: 4Z-C4L-1-SS**

Dimensions in inches (millimeters) are for reference only, subject to change.

Pressure Rating and Tubing Selection: For working pressures of A-LOK® and CPI™ tube connections, please see the Instrument Tubing Selection Guide (Bulletin 4200-TS), found in the Technical Section of the Parker Instrumentation Process Control Binder, or the Parker Instrument Tube Fitting Installation Manual (Bulletin 4200-B4).

For working pressures of valves with external or internal pipe threads, please see Catalog 4260, Instrumentation Pipe Fittings.

\* Tested in accordance with ISA S75.02. Gas flow will be choked when  $P_1 - P_2 / P_1 = x_T$ .

† For CPI™ and A-LOK®, dimensions are measured with nuts in the finger tight position.

## How to Order

Dimensions in inches (millimeters) are for reference only, subject to change.

The correct part number is easily derived from the following example and ordering chart. The six product characteristics required are coded as shown in the chart.

**Example 1** below describes a C Series Check Valve with 3/4" CPI™ compression inlet and outlet ports, a 5 psi cracking pressure, nitrile seal and brass body construction.

**Example 2** below describes a C Series Check Valve with a 1" male NPT inlet port and a 1" A-LOK® outlet port, a 10 psi cracking pressure, neoprene seal and stainless steel body construction.

**Example 1:** 12Z-C12L-5-BN-B (shown in the part number blocks below)

**Example 2:** 16M16A-C16L-10-NE-SS

Inlet Port*				Outlet Port*				Body Size	Crack Pressure	Seat Material	Body Material						
2A	2G5	2M	M3A	2A	2G5	2M	M3A	C2L	1/3 psi	Blank	Fluorocarbon	B	Brass

\*If the inlet and outlet ports are the same, eliminate the outlet port designator.

## Options

**Oxygen Cleaning** – Add the suffix **-C3** to the end of the part number to receive filters cleaned and assembled for oxygen service in accordance with Parker specification ES8003. **Example:** 4A-C4L-1-BN-SS-C3

**Laser Weld** – Add the suffix **-LW** to the end of the part number to receive tamper-resistant stainless steel filters. **Example:** 2F-C2L-1-SS-LW

**NGV Certification** – To receive valves approved and certified by CSA America, Inc, ECE R110, and ISO 15500 for use on natural gas vehicles, please contact the Instrumentation Products Division or your local authorized Parker distributor.

## Kit Information

To order repair kits for the C Series Check Valves simply fill in the designators from the chart below.

Size	Crack Pressure	Seat Material
C2	1/3 psi	V Fluorocarbon Rubber
C4	1 psi	BN Nitrile
C6	5 psi	EPR Ethylene Propylene Rubber
C8	10 psi	NE Neoprene Rubber
C12	25 psi	*T PTFE
C16	50 psi	KZ Highly Fluorinated Fluorocarbon
	75 psi	
	100 psi	

\*PTFE kits can only be used to replace factory installed PTFE seats. It cannot be interchanged with seats of any other material.

**Examples:** KIT-C8-10-V, KIT-C16-100-BN

### Check Valve Kits Contain:

- Instructions

CB  
CBF

## Introduction

Parker CB and CBF Series Check Valves are designed for uni-directional flow control of fluids and gases. The unique floating ball valve design handles demanding services in power generation, chemical processing, oil/gas production, and other demanding applications. The CB/CBF Series are specifically designed to reduce check valve maintenance and performance requirements on dual fuel turbines. Specific issues include, but are not limited to seat leakage, coking, repair and maintenance. All of these issues directly affect turbine efficiency, impacting operating costs. The advanced seat materials of the CB/CBF Series Check Valves are particularly suited for higher temperature applications requiring high integrity leak rates and re-sealing capabilities.

## Features

- ▶ Rugged and reliable floating ball valve seat design optimizes sealing characteristics while minimizing effects of coking.
- ▶ Optional hard PTFE coated ball cage resists poppet “stick” commonly experienced with fuel oil coking.
- ▶ Fully field serviceable with Parker rebuild kits. Replace seats in minutes without special tools.
- ▶ Advanced reinforced PTFE copolymer seat materials designed by Parker for demanding applications such as air purge and fuel oil.
- ▶ Integral “last chance” filter option for seat and nozzle protection.
- ▶ To even further reduce turbine downtime during repairs, utilize Parker’s metal flexible hoses.

## Specifications

### Shell Pressure Rating:

..... 3000 psi CWP

### Standard Crack Pressures:

..... 1, 5, 10, 15, 50, 100, 120

### Seat Materials, Back Pressure and Temperature Ratings:

Parkerfill..... 1000 psi @ 100°F  
 ..... 300 psi @ 450°F  
 Parker Carbon ..... 2500 psi @ 100°F  
 ..... 1250 psi @ 450°F

Parkerfill is a PTFE copolymer reinforced with carbon and graphite.  
 Parker Carbon is a PTFE copolymer reinforced with carbon.

## Materials of Construction

### CB Series Check Valve

Item #	Part	Stainless Valve
1	Body	ASTM A276, Type 316
2	Cap	ASTM A276, Type 316
3	Crack Spring	316 Stainless Steel
4	Ball Cage	ASTM A276, Type 316
5	Ball	440C Stainless Steel
6	Body Washer	316 SS PTFE Coated
7	Seat	Parkerfill, Parker Carbon

### CBF Series Filter Check Valve

Item #	Part	Stainless Valve
1	Cap	ASTM A276, Type 316
2	Body	ASTM A276, Type 316
3	Crack Spring	316 Stainless Steel
4	Ball Cage	ASTM A276, Type 316 Hard PTFE Coated
5	Ball	440C SS
6	Body Seal	Grafoil®
7	Seat Retainer	316 Stainless Steel
8	Seat	Parkerfill, Parker Carbon
9	Filter Base	316 Stainless Steel
10	Filter Element	Perforated 316 SS Sheet

Grafoil® is a registered trademark of GrafTech International Holdings, Inc.

## How to Order CB Series Check Valves

Dimensions in inches (millimeters) are for reference only, subject to change.

The correct part number is easily derived from the following example and ordering chart. The six product characteristics required are coded as shown in the chart.

The example below describes a CB Series Check Valve with 3/4" CPI™ compression inlet and outlet ports, a 120 psi crack pressure, Parkerfill seat and stainless steel body construction.

**Example:** 12Z-CB12L-120-PF-SS

12Z				-	CB12L	-	120	-	PF	-	SS
Inlet Port*		Outlet Port*			Body Size		Crack Pressure		Seat Material		Body Material
Inlet Port*		Outlet Port*			Body Size		Crack Pressure		Seat Material		Body Material
6A	8A	6A	8M		CB6L		1 psi	PF	Parkerfill	SS	316 Stainless Steel
6Z	8Z	6Z	8Z				5 psi	PC	Parker Carbon		
	8X	8A	8G5				10 psi				
8A	10A	8A	8Z		CB8L		25 psi				
8Z	10Z	8G5	10A				50 psi				
8X		8M	10Z				75 psi				
12A	12Z	12A	12M		CB12L		100 psi				
12X		12G5	12Z				120 psi				

\*If the inlet and outlet ports are the same, eliminate the outlet port designator.

## Repair Kits — CB Series Check Valves

Kits include seat, body gasket and crack spring. To order, fill in the designators from the chart below.

Kit	Size	Crack Pressure	Seat Material
KIT	CB6 CB8 CB12	1 psi	PF Parkerfill
		5 psi	PC Parker Carbon
		10 psi	
		15 psi	
		50 psi	
		100 psi	
		120 psi	

**Example** kit part number: **KIT-CB12-120-PF**

## How to Order CBF Series Check, Filter Valves

Dimensions in inches (millimeters) are for reference only, subject to change.

The correct part number is easily derived from the following example and ordering chart. The seven product characteristics required are coded as shown in the chart.

The example below describes a CBF Series Check, Filter Valve with a 1/2" CPI™ compression inlet and a 1/2" male NPT outlet, a 1 psi crack pressure, Parkerfill seat material, stainless steel body construction and a 380 Micron filter rating.

**Example: 8Z8M-CBF8L-1-PF-SS-380**

8Z		8M		-		CBF8L		-		1		-		PF		-		SS		-		380	
Inlet Port*		Outlet Port*				Body Size				Crack Pressure		Seat Material		Body Material				Filter Rating					
Inlet Port*		Outlet Port*				Body Size				Crack Pressure		Seat Material		Body Material				Filter Rating					
8A	10Z	8A	10Z	CBF8L		1 psi		PF Parkerfill		SS 316		75 Microns											
8X	12A	8G5	12A			5 psi		PC Parker Carbon		Stainless Steel		200 Microns											
8Z	12Z	8M	12G5			10 psi						380 Microns											
10A	12X	8Z	12M			25 psi						500 Microns											
		10A	12Z			50 psi																	
						75 psi																	
						100 psi																	
						120 psi																	

\*If the inlet and outlet ports are the same, eliminate the outlet port designator.

## Repair Kits — CBF Series Check, Filter Valves

Seal kits (KITS) include seat, body gasket and crack spring. Valve kits (KITV) include seat, body gaskets, crack spring and ball. Optional parts for valve kits include ball cage and filter. To order, fill in the designators from the chart below.

Kit	Size	Crack Pressure	Seat Material	Valve Kit Options	Filter Rating
KITS	CBF8	1 psi	PF Parkerfill	Blank None	75 Microns
KITV		5 psi	PC Parker Carbon	1 Ball Cage	200 Microns
		10 psi		2 Filter	380 Microns
		25 psi		3 Ball Cage & Filter	500 Microns
		50 psi			(Include with filter option)
		75 psi			
		100 psi			
120 psi					

### Examples:

Seal kit part number: **KITS-CBF8-10-PF**

Valve kit part number: **KITV-CBF8-10-3-200** (with Ball Cage and 200 micron filter option)

## Introduction

Parker CO Series Check Valves are designed for uni-directional flow control of fluids and gases in industries such as chemical processing, oil and gas production and transmission, pharmaceutical, pulp and paper, power and utilities. The CO Series Check Valve is particularly suitable for applications requiring high integrity leak rates and re-sealing capabilities.

CO

## Features

- ▶ Seal integrity across the seat and to atmosphere is tested to  $4 \times 10^{-9}$  std atm-cc/sec ( $4 \times 10^{-10}$  kPa – L/sec) for the CO4L with fluorocarbon rubber seals. All other sizes and seal materials are tested to  $1 \times 10^{-5}$  std atm-cc/sec ( $1 \times 10^{-6}$  kPa – L/sec).
- ▶ Special seat seal design provides a repeatable high integrity seal and accurate cracking pressures
- ▶ 100% factory tested. Cracking pressures include: 1/3, 1, 5, 10, 25, 50, 75, and 100 psi.
- ▶ Valves are available with male and female NPT, CPI™, A-LOK®, UltraSeal, male and female VacuSeal, and Tube Adapter
- ▶ Heat code traceability
- ▶ Color coded identification labels indicate seal material

## Specifications

**Pressure Rating:** .....6000 psig (414 bar) CWP

### Temperature Rating:

- Fluorocarbon Rubber..... -15°F to 400°F (-26°C to 204°C)
- Nitrile Rubber..... -30°F to 250°F (-34°C to 121°C)
- Ethylene Propylene Rubber  
..... -70°F to 275°F (-57°C to 135°C)
- Highly Fluorinated Fluorocarbon Rubber  
..... -15°F to 200°F (-26°C to 93°C)

**Orifice:** ..... .156" to .406" (4.0mm to 10.3mm)

**C<sub>v</sub>:** ..... .43 to 2.65

## Materials of Construction

**Model Shown: 4V-CO4L-5-V-SS**

Item #	Part	Stainless Valve
1	Cap*	ASTM A276, Type 316
2	Seat Seal	Fluorocarbon Rubber**
3	Body Seal	Fluorocarbon Rubber**
4	Poppet	ASTM A479, Type 316
5	Spring	316 Stainless Steel
6	Label	Aluminum
7	Body*	ASTM A276, Type 316

\* For Female VacuSeal ports, body and cap are manufactured from ASTM A479, TYPE 316L.

\*\* Optional seal materials are available. See How to Order section.  
Lubrication: Perfluorinated Polyether

## Flow Calculations with 1000 psig (69 bar) Inlet Pressure

Valve Series	Maximum C <sub>v</sub>	Pressure Drop ΔP		Water @ 60-1/2°F (16-1/2°C)		Air @ 60-1/2°F (16-1/2°C)	
		psig	bar	gpm	m <sup>3</sup> /hr	SCFM	m <sup>3</sup> /hr
C04	0.62	10	0.7	2.0	0.4	61.8	104.5
		50	3.4	4.4	1.0	135.7	227.7
		100	6.9	6.2	1.4	187.5	316.7
C06	1.85	10	0.7	5.9	1.3	184.4	311.6
		50	3.4	13.1	3.0	404.4	678.5
		100	6.9	18.5	4.2	557.9	942.3
C08	2.65	10	0.7	8.4	1.9	264.2	446.5
		50	3.4	18.7	4.2	580.3	973.8
		100	6.9	26.5	6.0	802.3	1355.3

## Crack and Re-Seal Performance

Check Valve Rated Crack Pressure		Minimum Acceptable Crack Pressure		Maximum Acceptable Crack Pressure		Maximum Re-seal Back Pressure	
psig	bar	psig	bar	psig	bar	psig	bar
1/3	0.02	0	0.00	1	0.07	4	0.28
1	0.07	0	0.00	3	0.21	4	0.28
5	0.34	3	0.21	8	0.55	3 BCP	0.21 BCP
10	0.69	7	0.48	13	0.90	3 BCP	0.21 BCP
25	1.72	20	1.38	30	2.07	4 BCP	0.28 BCP
50	3.45	40	2.76	60	4.14	5 BCP	0.34 BCP
75	5.17	60	4.14	90	6.21	7 BCP	0.48 BCP
100	6.89	80	5.52	120	8.27	10 BCP	0.69 BCP

BCP means "Below Cracking Pressure."

Cracking pressure is defined as the upstream pressure at which a detectable flow is measured.

Re-seal pressure is defined as the downstream pressure at which the check valve closes bubble-tight.

**Example:** For a valve with a spring having a rated cracking pressure of 25 psig (1.72 bar), the actual cracking pressure ranges between 20 and 30 psig (1.38 and 2.07 bar). The re-seal pressure range would be 16 to 20 psig (1.10 to 1.38 bar). Check valves having springs with rated crack pressures of 3 psig (0.21 bar) or less may require up to 4 psig (0.28 bar) back pressure to re-seal bubble-tight.

**Note:** Check valves which are not actuated for a period of time may initially crack at higher than the above crack pressure ranges.

## Pressure vs. Temperature

**Note:** To determine MPa, multiply bar by 0.1

**Nitrile Seal**

**Fluorocarbon Seal**

**Ethylene Propylene Seal**

**Highly Fluorinated Fluorocarbon Seal**

## Dimensions and Flow Data

CO

## Label Color Cross Reference

Label Color	Seal Material
Brown	Fluorocarbon Rubber
Black	Nitrile Rubber
Purple	Ethylene Propylene Rubber
Green	All others

D = Hex of nuts where applicable

### Model Shown: 4V-CO4L-5-KZ-SS

**Testing:** All valves are 100% tested for crack, re-seal, and helium leakage.

Dimensions in inches (millimeters) are for reference only, subject to change.

\*Cracking Pressure \*\*Seal Designator

\* Tested in accordance with ISA S75.02. Gas flow will be choked when  $P_1 - P_2 / P_1 = X_T$ .

† For CPI™ and A-LOK®, dimensions are measured with nuts in the finger tight position.

## How to Order

Dimensions in inches (millimeters) are for reference only, subject to change.

The correct part number is easily derived from the following example and ordering chart. The six product characteristics required are coded as shown in the chart.

The example below describes a CO Series Check Valve with 1/4" male NPT inlet and a 1/4" female NPT outlet, 1 psig cracking pressure, fluorocarbon rubber seals, and stainless steel body construction.

**Example: 4M4F-CO4L-1-V-SS**

Inlet Port*				Outlet Port*				Body Size	Crack Pressure	Seat & Seal Material	Body Material	
4A	4Q	4V1	M6A	4A	4Q	4V1	M6A	CO4L	1/3 psi	V	Fluorocarbon Rubber	SS 316 Stainless Steel
4F	4TA	4Z	M6Z	4F	4TA	4Z	M6Z		1 psi			
4M	4V			4M	4V				5 psi	BN	Nitrile Rubber	
6A	6TA	8V	M8A	6A	6TA	8V	M8A	C06L	10 psi	EPR	Ethylene Propylene Rubber	
6F	6Z	8V1	M8Z	6F	6Z	8V1	M8Z		25 psi			
6M				6M					50 psi	KZ	Highly Fluorinated Fluorocarbon Rubber	
8A	8Q	8V1	M12A	8A	8Q	8V1	M12A	75 psi				
8F	8TA	8Z	M12Z	8F	8TA	8Z	M12Z	C08L	100 psi			
8M	8V			8M	8V							

\*If the inlet and outlet port s are the same, eliminate the outlet port designator.

## Options

**Oxygen Cleaning** – Add the suffix **-C3** to the end of the part number to receive filters cleaned and assembled for oxygen service in accordance with Parker specification ES8003. **Example:** 4A-CO4L-1-BN-SS-C3

**Special Cleaning** – All face seal ended valves are cleaned in accordance with Parker Specification ES8001. This is an option for all valves by adding the suffix **-C1** to the end of the part number. **Example:** M6A-CO4L-10-SS-C1

**Material** – Contact the factory for availability of AOD/VAR stainless steel and ID Electropolish.

## Introduction

Parker's LC-Series Lift Check Valve has been designed for a wide variety of temperature extremes found in power, chemical, petrochemical, oil & gas, and laboratory applications. The LC-Series, ideal for liquid service, has been designed to prevent flow in the reverse direction to within 99.9% of forward flow. The gravity assisted poppet uses back pressure to achieve a seal.

## Features

- ▶ Wide temperature range
- ▶ Variety of end connections available
- ▶ Compact design
- ▶ Rugged, forged body construction
- ▶ Stainless steel construction

## Specifications

### Pressure Rating

.....6000 psig (414 bar) CWP

### Temperature Rating

..... -100°F to 900°F (-148°C to 482°C)

### Flow Data:

LC6 Series.....  $C_V = .63$     $X_T = .47$   
 LC12 Series.....  $C_V = 1.20$     $X_T = .63$   
 LC16 Series.....  $C_V = 2.29$     $X_T = .65$

**Note:** Valve must be mounted in proper orientation.

## Dimensions

Dimensions in inches (millimeters) are for reference only, subject to change.

Part #	Size/Connection	A	B	C	Bonnet Hex

For CPI™ A-LOK®, dimensions are measured with nuts in the finger-tight position.  
 Metric dimensions are noted by ( ).

## Materials

Item #	Part	Stainless Valve
1	Poppet Guide	ASTM A479, Type 316
2	Bonnet Nut	ASTM A479, Type 316
3	Poppet	ASTM A564, Type 630
4	Valve Body	ASTM A182, Type F316

LC16 Series utilizes a nickel-chromium-iron alloy bonnet seal.

## MPC and MPCB Series Check Valves

Parker MPC and MPCB series check valves are designed for uni-directional flow control of fluids and gases up to 15,000 psi.

### Ball Check Valves

**Example:** 4F-MPCL-5-V-SS

## Introduction

Parker F Series Inline Filters are designed for protection of instrumentation systems from undesirable materials. Component changes or repair and maintenance can admit dirt, chips, scale, or other contaminants to the small bore tubing.

## Features

- ▶ Compact inline design with large filtration area
- ▶ Stainless steel and brass construction
- ▶ Replaceable sintered 316 stainless steel filter element
- ▶ Standard sintered metal micron ratings: 1, 5, 10, 50, and 100
- ▶ Optional 250 and 450 micron wire cloth filter elements
- ▶ Port connections include male and female NPT, CPI™, A-LOK®, UltraSeal, VacuSeal, BSP, SAE, and Seal-Lok®
- ▶ Heat code traceability

## Materials of Construction

**Model shown: 4A-F4L-50-SS**

Note: Flow direction reversed with wire mesh elements.

## Specifications

### Pressure Rating:

**Note:** Optional wire cloth filter elements may slightly alter dimensions A and B on filters with combination end connections.

†For CPI™ and A-Lok®: Dimensions are measured with nuts in the finger tight position.

## How to Order

Dimensions in inches (millimeters) are for reference only, subject to change.

The correct part number is easily derived from the following example and ordering chart. The six product characteristics required are coded as shown in the chart.

**Example 1** below describes an F Series Inline Filter with 1/4" male NPT inlet and outlet ports, a 5 micron element, Nitrile seal and brass body construction.

**Example 2** below describes an F Series Inline Filter with a 1" male NPT inlet port and a 1" A-LOK® outlet port, a 10 micron element, neoprene seal and stainless steel body construction.

**Example 1:** 4M-F4L-5-BN-B (shown in the part number blocks below)

**Example 2:** 16M16A-F16L-10-NE-SS

Inlet Port*				Outlet Port*				Body Size	Micron Rating	Seal Material	Body Material

16F5	16KM	16TA	M25Z	16F5	16KM	16TA	M25Z				

\*\* Only available with stainless steel filters.

\*If the inlet and outlet ports are the same, eliminate the outlet port designator.

## Options

**Oxygen Cleaning** – Add the suffix **-C3** to the end of the part number to receive filters cleaned and assembled for oxygen service in accordance with Parker specification ES8003. **Example:** 4A-F4L-10-V-SS-C3

**Laser Weld** – Add the suffix **-LW** to the end of the part number to receive tamper-resistant stainless steel filters. **Example:** 2M-F2L-5-SS-LW

## Kit Information

To order repair kits for the F Series Inline Filters simply fill in the designators from the chart below.

Size	Micron Rating	Seat Material
F2	1 micron	<b>V</b> Fluorocarbon Rubber
F4	5 micron	<b>BN</b> Nitrile Rubber
F6	10 micron	<b>EPR</b> Ethylene Propylene Rubber
F8	50 micron	<b>NE</b> Neoprene Rubber
F12	100 micron	<b>T</b> PTFE
F16	450 micron	<b>KZ</b> Highly Fluorinated Fluorocarbon

**Examples:** KIT-F8-10-V, KIT-F16-100-BN

**Filter Kits Contain:** Molded Seal, Filter Element, Guide Ring, Spring and Maintenance Instructions

**F Caution:** When interchanging sintered metal elements with wire cloth filter elements, the flow direction is reversed.

## Introduction

Parker FT Series Tee Filters are designed for protection of instrumentation systems from undesirable materials. Component changes or repair and maintenance can admit dirt, chips, or other contaminants to the small bore tubing.

## Features

- ▶ Filter element replacement achievable without removing filter from installation
- ▶ Compact, high strength forged body design with effective filtration areas of:
  - FT4 – 1.57 sq in (1013 sq mm)
  - FT8 – 2.53 sq in (1632 sq mm)
- ▶ Stainless steel and brass construction
- ▶ Standard sintered metal micron ratings: 1, 5, 10, 50, and 100
- ▶ Optional 250 and 450 micron wire cloth filter elements
- ▶ Optional bypass enables a continuous self cleaning flow around the element
- ▶ Port connections include male and female NPT, CPI™, A-LOK®, UltraSeal, and VacuSeal

## Specifications

### • Pressure Ratings:

With Elastomeric and Metallic Seals:

- Stainless Steel .....6000 psig (414 bar) CWP
- Brass.....2000 psig (138 bar) CWP

With PTFE Seals:

- Stainless Steel .....4000 psig (276 bar) CWP
- Brass.....2000 psig (138 bar) CWP

### Pressure Rating and Tubing Selection:

For working pressures of A-LOK® and CPI™ tube connections, please see the Instrument Tubing Selection Guide (Bulletin 4200-TS), found in the Technical Section of the Parker Instrumentation Process Control Binder, or the Parker Instrument Tube Fitting Installation Manual (Bulletin 4200-B4).

For working pressures of valves with external or internal pipe threads, please see Catalog 4260, Instrumentation Pipe Fittings.

## Definitions

**Filter Element** – The component within the filter which captures media contamination.

**Filtration Area** – The surface area of the filter element available to capture contamination.

**Micron** – A unit of measure used to indicate the mean pore diameter of the filter element or the mean particle diameter of media contamination.

*One micron* = 0.00004 inch or 0.0010 mm

**Model Shown: 4Z-FT4-10-BN-SS**

## Materials of Construction

Item #	Part	Stainless Steel Filter	Brass Filter
1	Body	ASTM A182, Type F316	ASTM B283, Alloy C37700
2	Washer	316 Stainless Steel	
3	Nut	ASTM A479, Type 316	ASTM B16, Alloy C36000
4	Cap	ASTM A479, Type 316	ASTM B16, Alloy C36000
5	Retainer Ring	PH 15-7 Mo Stainless Steel	
6	Spring	316 Stainless Steel	
7	Seal	Fluorocarbon Rubber	
8	Element	316 Stainless Steel	

\* Optional seal materials are available. See How to Order section.  
Lubrication: Perfluorinated Polyether.

## Installation

Best installation practice is to orient the cap downward. This helps to prevent contaminants from entering the system during element change.

## Pressure vs. Temperature

### Nitrile Seat

**Note:** This Pressure versus Temperature chart reflects the maximum temperature range of indicated body materials.

The temperature rating of the seal becomes the limiting factor on temperature range.

### Temperature Ratings:

- Nitrile Rubber..... -40°F to 275°F (-40°C to 135°C)
- Highly Fluorinated Fluorocarbon Rubber  
..... -20°F to 500°F (-29°C to 260°C)
- Ethylene Propylene Rubber  
..... -70°F to 300°F (-57°C to 149°C)
- Fluorocarbon Rubber..... -40°F to 400°F (-40°C to 204°C)
- Neoprene Rubber..... -65°F to 300°F (-54°C to 149°C)
- Silver Plated Nickel Alloy Gasket (C-ring)  
..... -100°F to 900°F (-73°C to 482°C)
- PTFE ..... -70°F to 400°F (-56°C to 204°C)

**Note:** To determine MPa, multiply bar by 0.1

## Flow Calculations with 100 psig (7 bar) Inlet Pressure

## How to Order

Dimensions in inches (millimeters) are for reference only, subject to change.

The correct part number is easily derived from the following example and ordering chart. The six product characteristics required are coded as shown in the chart.

The example below describes an FT Series Filter with 1/4" male NPT inlet and outlet ports, a 5 micron element, Nitrile seal and brass body construction.

**Example: 4M-FT4-5-BN-B**

4M				-				FT4				-				5				-				BN				-				B			
Inlet Port*				Outlet Port*				Valve Series				Micron Rating				Seal Material				Body Material

8A	8Z	M10A	M12Z	8A	8Z	M10A	M12Z						T	PTFE																					

\*If the inlet and outlet ports are the same, eliminate the outlet port designator.

## Options

**Oxygen Cleaning** – Add the suffix **-C3** to the end of the part number to receive filters cleaned and assembled for oxygen service in accordance with Parker specification ES8003. **Example:** 4A-FT4-10-V-SS-C3

**Bypass** – Add the suffix **-PB** to the end of the part number to receive a 1/8" -27 FNPT tapped Cap for sampling. **Example:** 2M-FT4-5-V-SS-PB

**Integral Compression Ported Bypass Option** – Add the suffix **-PBA** (A-LOK®) or **-PBZ** (CPI™) to the end of the part number to receive a 4Z/4A (FT4) or 6A/6Z (FT8) compression ported Cap.

**Example:** 2M-FT4-5-V-SS-PBZ

## Kit Information

To order repair kits for the FT Series Filters, simply fill in the designators from the chart below.

Size	Micron Rating	Seal Material
FT4	1 micron	V Fluorocarbon Rubber
FT8	5 micron	BN Nitrile Rubber
	10 micron	EPR Ethylene Propylene Rubber
	50 micron	NE Neoprene Rubber
	100 micron	KZ Highly Fluorinated Fluorocarbon
	250 micron	HT Silver PLated Nickel Alloy C-Ring
	450 micron	

**Examples:** KIT-FT4-10-V, KIT-FT8-100-BN

**Filter Kits Contain:** Seals, Filter Element, Spring and Maintenance Instructions.

**Caution:** When interchanging sintered metal elements with wire cloth filter elements, the flow direction is reversed.

## MPF Series Filters

Parker MPF series filters utilize sintered stainless steel filter discs to trap particles from 0.5 to 100 micron sizes. Inline filters help protect valuable equipment in the process line.

## Inline Filters

Dimensions in inches (millimeters) are for reference only, subject to change.

## Introduction

Parker RH4 Relief Valves are designed such that when the upstream pressure exceeds the closing force exerted by the spring, the lower stem opens, permitting flow through the valve. Flow through the valve increases proportionately to the increase in upstream pressure.

## Features

- ▶ Pressure settings are externally adjustable while the valve is in operation. Eight different spring ranges provide greater system sensitivity and enhanced performance.
- ▶ Captured molded seat design is blow-out and chip resistant.
- ▶ Manual Override option with positive stem retraction is available for pressures up to 1500 psig (103 bar). This option permits the user to relieve upstream pressure while maintaining the predetermined cracking pressure.
- ▶ Color coded springs and labels indicate spring cracking range.
- ▶ Lock wire feature secures a given pressure setting.

## Specifications

### Working Pressure:

Up to 6000 psig (414 bar) CWP.

Up to 8000 psig (552 bar) during relief with no internal seal damage.

### Cracking Pressure:

Eight springs, from 50 psig to 6000 psig in the following ranges:

50-350 psig (3.4-24.1 bar)	350-750 psig (24.1-51.7 bar)	750-1500 psig (51.7-103.4 bar)
1500-2250 psig (103.4-155.1 bar)	2250-3000 psig (155.1-206.8 bar)	3000-4000 psig (206.8-275.8 bar)
4000-5000 psig (275.8-344.7 bar)	5000-6000 psig (344.7-413.7 bar)	

### Temperature Rating:

Nitrile Rubber.....-30°F to +225°F (-34°C to +107°C)

Highly Fluorinated Fluorocarbon Rubber  
.....-20°F to +200°F (-29°C to +93°C)

Ethylene Propylene Rubber  
.....-70°F to +275°F (-57°C to +135°C)

Fluorocarbon Rubber ..-10°F to +400°F (-23°C to +204°C)

Neoprene Rubber .....-45°F to +250°F (-43°C to +121°C)

RH4

RH4

## How to Order

Dimensions in inches (millimeters) are for reference only, subject to change.

The correct part number is easily derived from the following example and ordering chart. The eight product characteristics required are coded as shown in the chart.

**Example 1** below describes an RH4A Series externally adjustable relief valve equipped with 1/4" CPI™ compression inlet and outlet ports, Nitrile seals, PTFE back-up ring, stainless steel construction, and a 3000 to 4000 psig (206.8 to 275.8 bar) spring kit.

**Example 2** below describes an RH4A Series externally adjustable relief valve equipped with 1/4" male NPT inlet port, 1/4" female NPT outlet port, ethylene propylene seals, PTFE back-up ring, stainless steel construction, manual override option, and a 50 to 350 psig (3.4 to 24.1 bar) spring kit.

**Example 1:** 4Z-RH4A-BNT-SS-K6 (shown in the part number blocks below)

**Example 2:** 4M4F-4H4A-EPRT-SS-MN-K1

### Spring Kit Contains:

- Spring
- Coded label
- PTFE washers
- Locking wire / lead seal
- Installation Instructions

## Seal Kits

Kit Part Number	Seat/Seal Material
KIT-RH4-VT	Fluorocarbon Rubber
KIT-RH4-BNT	Nitrile Rubber
KIT-RH4-EPRT	Ethylene Propylene Rubber
KIT-RH4-NET	Neoprene Rubber
KIT-RH4-KZT	Highly Fluorinated Fluorocarbon Rubber

### Seal Kit Contains:

- Stem Seal
- Bonnet Seal
- PTFE Back-Up Ring
- Lower Stem Assembly
- Maintenance Instructions

## Introduction

Parker RL4 Relief Valves are designed such that when the upstream pressure exceeds the closing force exerted by the spring, the lower stem opens, permitting flow through the valve. Flow through the valve increases proportionately to the increase in upstream pressure.

## Features

- ▶ Pressure settings are externally adjustable while the valve is in operation. Seven different spring ranges provide greater system sensitivity and enhanced performance.
- ▶ Manual override option with positive stem retraction is available for the full working pressures range. This option permits the user to relieve upstream pressure while maintaining the predetermined cracking pressure.
- ▶ Color coded springs and labels indicate spring cracking range.
- ▶ Back pressure has minimum effect on cracking pressure.
- ▶ Lock wire feature secures a given pressure setting.

## Specifications

### Working pressure:

Up to 400 psig (28 bar) CWP

Up to 600 psig (41 bar) during relief with no internal seal damage.

### Cracking pressure:

Seven springs with the following ranges:

10-25 psig (0.7-1.7 bar)	25-50 psig (1.7-3.4 bar)	50-100 psig (3.4-6.9 bar)
100-150 psig (6.9-10.3 bar)	150-225 psig (10.3-15.5 bar)	225-400 psig (15.5-27.6 bar)
10-225 psig (0.7-15.5 bar)		

### Temperature Rating:

## Crack Pressure vs. Reseal Pressure

**Note:** Valves which are not actuated for a period of time may initially crack at higher than set crack pressures.

**Note:** To determine MPa, multiply bar by 0.1

## How to Order

Dimensions in inches (millimeters) are for reference only, subject to change.

The correct part number is easily derived from the following example and ordering chart. The eight product characteristics required are coded as shown in the chart.

**Example 1** below describes an RL4A Series externally adjustable relief valve equipped with 1/4" CPI™ compression inlet and outlet ports, Nitrile seals, PTFE back-up ring, stainless steel construction, and a 100 to 150 psig (6.9 to 10.3 bar) spring kit.

**Example 2** below describes an RL4A Series externally adjustable relief valve equipped with 1/4" male NPT inlet port, 1/4" female NPT outlet port, ethylene propylene seals, PTFE back-up ring, stainless steel construction, manual override option, and a 10 to 225 psig (0.7 to 15.5 bar) spring kit.

**Example 1:** 4Z-RL4A-BNT-SS-KD (shown in the part number blocks below)

**Example 2:** 4M4F-RL4A-EPRT-SS-MN-KF

4Z		-	RL4A	-	BN	T	-	SS	-		-	KD

### Spring Kit Contains:

- Spring
- Coded label
- PTFE washers
- Locking wire / lead seal
- Installation Instructions

## Seal Kits

Kit Part Number	Seat/Seal Material
KIT-RL4-VT	Fluorocarbon Rubber
KIT-RL4-BNT	Nitrile Rubber
KIT-RL4-EPRT	Ethylene Propylene Rubber
KIT-RL4-NET	Neoprene Rubber
KIT-RL4-KZT	Highly Fluorinated Fluorocarbon Rubber

### Seal Kit Contains:

- Stem Seal
- Bonnet Seal
- PTFE Back-Up Ring
- Lower Stem Assembly
- Maintenance Instructions

## MPR Series Relief Valves

Parker MPR series relief valves are offered in preset pressure relief ranges from 1500 to 20,999 psi. Relief valves are tagged with the proper factory preset pressures.

### Relief Valves (Factory Set)

Dimensions in inches (millimeters) are for reference only, subject to change.

Parker Part Number	Pressure Rating psi	Connection	Orifice Inch	Max Flow Capacity GPM
8M8F-MPRA-****-SS	1,500 to 2,999	1/2" M X F NPT	0.250	13

## Introduction

Parker BV Series Bleed Valves are designed for use on products such as multi-valve manifolds or gauge/root valves. Functionally, the valve vents line pressure either to atmosphere or to containment when used with the optional barbed vent tube. Generally, bleed valves are used whenever an instrument is removed from a system or to assist in the calibration of control devices. The BV Series is also recommended for use in bleeding hydraulic systems.

## Features

- ▶ Available in stainless steel, carbon steel and Alloy N24135
- ▶ Vent tube directs excess gas or liquid from system lines
- ▶ Chrome plated stem provides extended cycle life with improved sealability
- ▶ Positive stop/vent tube design prevents accidental removal of the stem
- ▶ Compact design
- ▶ Wrench actuation
- ▶ Available in a variety of end configurations including male pipe and SAE ports
- ▶ 100% factory tested
- ▶ Barbed vent tube option enables containment of vented media
- ▶ Optional T-bar handle for wrench-less actuation

## Specifications

### Pressure Rating:

..... 10,000 psig (689 bar) CWP

### Temperature Rating:

Stainless Steel..... -65°F to 850°F (-54°C to 454°C)

Carbon Steel..... -20°F to 450°F (-29°C to 232°C)

Alloy N24135 (400)..... -65°F to 500°F (-54°C to 260°C)

## Flow Data

$C_v = 0.13$ ;  $x_T = 0.53$ ; Orifice = 0.125" (3.2mm).

Tested in accordance with ISA S75.02.

Gas flow will be choked when  $P_1 - P_2 / P_1 = x_T$ .

## Materials of Construction

Model Shown: 4M-BV4-SS

Item #	Part	Stainless Steel	Carbon Steel	Alloy 400
1	Stem	ASTM A479, Type 316		ASTM B164
2	Valve Body	ASTM A479, Type 316	ASTM A108, Grade 12L14	ASTM B164
3	Vent Tube	316 Stainless Steel		ASTM B164

Lubrication: Molybdenum disulfide with soft metallic fillers

## Caution

These valves do not have a stem seal. It is imperative to open the valve slowly and direct the vent tube away from persons operating or near the valve. Because of the absence of a stem seal, small amounts of media will flow through the stem thread area when the valves are opened.

## Dimensions

( ) Denotes dimensions in millimeters

Model Shown: 4M-BV4-SS

Model Shown: 8M-BV8-SS-BVT-T

Dimensions in inches (millimeters) are for reference only, subject to change.

Basic Part Number	End Connections		Dimensions

## How to Order

Dimensions in inches (millimeters) are for reference only, subject to change.

The correct part number is easily derived from the following example and ordering chart. The six product characteristics required are coded as shown in the chart.

The example below describes a stainless steel BV4 Bleed Valve with a 1/4" male NPT inlet and a barbed vent tube outlet. It does not have a handle.

Example: 4M-BV4-SS-BVT

4M	-	BV4	-	SS	-	BVT	-	
End Connection		Valve Series		Material		Vent Selection		Handle Option
End Connection		Valve Series		Material		Vent Selection		Handle Option
2M    4KM 4M    4F5**		BV4		SS Stainless Steel S Carbon Steel M Alloy N24135		Blank Vent Tube BVT Barbed Vent Tube		Blank No Handle T Tee Bar Handle
6M    8M 8F5**		BV8						

\* If the inlet and outlet ports are the same, eliminate the outlet port designator.

\*\* Male SAE port will be supplied with a fluorocarbon rubber O-ring by adding O after F5; i.e., 4F5O.

## Medium Pressure Bleed Valve

Parker Part No.	PSI	Connection
9T7-MPBV-V-SS	15,000	9/16" Tube Stub
9HM-MPBV-V-SS	30,000	9/16" High Pressure Male

**Note:** Outlet is 1/8" FNPT

### Materials of Construction

Item #	Qty	Description	Material
1	1	Soc Set Screw	300 Ser. SS
2	1	Handle	Aluminum
3	1	Stem	17-4PH-H900
4	2	Rolling Pin	420SS
5	1	O-Ring	Fluorocarbon Rubber
6	1	Body	316SS

## Introduction

Parker PG Series Purge Valves may be utilized as either bleed, purge, or drain valves. The compact valve requires only a quarter turn with a wrench from finger-tight to ensure a leak-tight seal on the first make-up. Additional wrenching ensures a leak-tight seal up to the rated pressure.

## Features

- ▶ A 0.055 inch (1.4 mm) diameter vent hole in the cap bleeds, drains, or purges system pressure
- ▶ Hex cap permits finger-tight or wrench assisted closure
- ▶ Crimped cap resists accidental disassembly
- ▶ A variety of body styles offers system design flexibility, reduced space requirements, and helps to eliminate leak paths
- ▶ Available in a variety of end configurations including: CPI™, A-LOK®, male and female NPT, SAE, and Tube Adapter connections
- ▶ 100% factory tested
- ▶ Optional PTFE Ball requires only finger-tight torque to achieve a leak-tight seal

## Specifications

### Temperature Rating:

Stainless Steel.....-65°F to 600°F (-54°C to 316°C)  
 Brass .....-65°F to 400°F (-54°C to 204°C)  
 Carbon Steel.....-20°F to 350°F (-29°C to 177°C)  
 PTFE Ball Option.....-65°F to 350°F (-54°C to 177°C)

### Pressure Rating:

Stainless Steel.....4000 psig (276 bar) CWP  
 Brass .....3000 psig (207 bar)  
 Carbon Steel.....3000 psig (207 bar)  
 PTFE Ball Option.....200 psig (14 bar)

## Caution

These valves do not have a cap thread seal. It is imperative to open the valve slowly and direct the vent hole away from persons operating or near the valve. Because of the absence of a cap seal, small amounts of media will flow through the cap thread area when the valves are opened.

## PTFE Ball Option

Purge Valves with the PTFE ball option require only finger-tight operation for leak-tight shut-off and are designed with a removable cap for ball replacement.

## Materials of Construction and Dimensions

( ) Denotes dimensions in millimeters

## How to Order

The correct part number is easily derived from the following example and ordering chart. The seven product characteristics required are coded as shown in the chart.

The example below describes a stainless steel, 90° angle body PG4 Purge Valve with a 1/8" male NPT port configuration and a PTFE Ball.

**Example: 2M-PG4A-SS-T**

End Connection*				Valve Series	Body Type	Material	Ball				
2A	4A	6A	8A	M6A	PG4	L	Straight	SS	Stainless Steel	Blank	Stainless Steel
2Z	4Z	6F	8F	M6Z		A	90° Elbow				
2F	4F	6M	8F5*	M8A		E	45° Elbow	B	Brass	T	PTFE
2M	4F5**	6TA	8M	M8Z		TL	Tee with Inline Flow				
2TA	4M	6Z	8TA			TA	Tee with Angle Flow	S	Carbon Steel		
4TA			8Z			U	Union				

\* If the ports are the same, only specify one end connection.

\*\* Male SAE port will be supplied with a fluorocarbon rubber O-ring by adding O after F5; i.e., 4F5O.

## Option

**Oxygen Cleaning –** Add the suffix **-C3** to the end of the part number to receive valves cleaned for oxygen service per IVD Specification ES8003. **Example:** 2M-PG4A-SS-T-C3

Dimensions in inches (millimeters) are for reference only, subject to change.

## Available End Connections

### Standard End Connections

**A** - Two ferrule A-LOK® compression port

**Z** - Single ferrule CPI™ compression port

**F** - ANSI/ASME B1.20.1 internal pipe threads

**M** - ANSI/ASME B1.20.1 external pipe threads

### Non-Standard End Connections

**TA** - Tube adapter connection

**F5** - SAE J1926/2, Part 2: Heavy-duty (S Series) stud ends

**G5** - SAE J1926/1, Part 1: Threaded port with O-ring seal in truncated housing

**L** - SAE J1453, Fitting – O-ring face seal – External thread with O-ring groove designed to seal with an elastomer against a sleeve

**KF** - British Standard BS 21 (ISO 7-1), Internal pipe threads

**KM** - British Standard BS 21 (ISO 7-1), External pipe threads

**Q** - UltraSeal face seal port

**V** - VacuSeal face seal port

End Conn

## Offer of Sale

The items described in this document and other documents and descriptions provided by Parker Hannifin Corporation, its subsidiaries and its authorized distributors ("Seller") are hereby offered for sale at prices to be established by Seller. This offer and its acceptance by any customer ("Buyer") shall be governed by all of the following Terms and Conditions. Buyer's order for any item described in its document, when communicated to Seller verbally, or in writing, shall constitute acceptance of this offer. All goods or work described will be referred to as "Products".

**1. Terms and Conditions.** Seller's willingness to offer Products, or accept an order for Products, to or from Buyer is expressly conditioned on Buyer's assent to these Terms and Conditions and to the terms and conditions found on-line at [www.parker.com/saleterms/](http://www.parker.com/saleterms/). Seller objects to any contrary or additional term or condition of Buyer's order or any other document issued by Buyer.

**2. Price Adjustments; Payments.** Prices stated on the reverse side or preceding pages of this document are valid for 30 days. After 30 days, Seller may change prices to reflect any increase in its costs resulting from state, federal or local legislation, price increases from its suppliers, or any change in the rate, charge, or classification of any carrier. The prices stated on the reverse or preceding pages of this document do not include any sales, use, or other taxes unless so stated specifically. Unless otherwise specified by Seller, all prices are F.O.B. Seller's facility, and payment is due 30 days from the date of invoice. After 30 days, Buyer shall pay interest on any unpaid invoices at the rate of 1.5% per month or the maximum allowable rate under applicable law.

**3. Delivery Dates; Title and Risk; Shipment.** All delivery dates are approximate and Seller shall not be responsible for any damages resulting from any delay. Regardless of the manner of shipment, title to any products and risk of loss or damage shall pass to Buyer upon tender to the carrier at Seller's facility (i.e., when it's on the truck, it's yours). Unless otherwise stated, Seller may exercise its judgment in choosing the carrier and means of delivery. No deferment of shipment at Buyers' request beyond the respective dates indicated will be made except on terms that will indemnify, defend and hold Seller harmless against all loss and additional expense. Buyer shall be responsible for any additional shipping charges incurred by Seller due to Buyer's changes in shipping, product specifications or in accordance with Section 13, herein.

**4. Warranty.** Seller warrants that the Products sold hereunder shall be free from defects in material or workmanship for a period of twelve months from the date of delivery to Buyer or 2,000 hours of normal use, whichever occurs first. This warranty is made only to Buyer and does not extend to anyone to whom Products are sold after purchased from Seller. The prices charged for Seller's products are based upon the exclusive limited warranty stated above, and upon the following disclaimer: **DISCLAIMER OF WARRANTY: THIS WARRANTY COMPRISES THE SOLE AND ENTIRE WARRANTY PERTAINING TO PRODUCTS PROVIDED HEREUNDER. SELLER DISCLAIMS ALL OTHER WARRANTIES, EXPRESS AND IMPLIED, INCLUDING MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE.**

**5. Claims; Commencement of Actions.** Buyer shall promptly inspect all Products upon delivery. No claims for shortages will be allowed unless reported to the Seller within 10 days of delivery. No other claims against Seller will

be allowed unless asserted in writing within 60 days after delivery or, in the case of an alleged breach of warranty, within 30 days after the date within the warranty period on which the defect is or should have been discovered by Buyer. Any action based upon breach of this agreement or upon any other claim arising out of this sale (other than an action by Seller for any amount due to Seller from Buyer) must be commenced within thirteen months from the date of tender of delivery by Seller or, for a cause of action based upon an alleged breach of warranty, within thirteen months from the date within the warranty period on which the defect is or should have been discovered by Buyer.

**6. LIMITATION OF LIABILITY.** UPON NOTIFICATION, SELLER WILL, AT ITS OPTION, REPAIR OR REPLACE A DEFECTIVE PRODUCT, OR REFUND THE PURCHASE PRICE. IN NO EVENT SHALL SELLER BE LIABLE TO BUYER FOR ANY SPECIAL, INDIRECT, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF, OR AS THE RESULT OF, THE SALE, DELIVERY, NON-DELIVERY, SERVICING, USE OR LOSS OF USE OF THE PRODUCTS OR ANY PART THEREOF, OR FOR ANY CHARGES OR EXPENSES OF ANY NATURE INCURRED WITHOUT SELLER'S WRITTEN CONSENT, EVEN IF SELLER HAS BEEN NEGLIGENT, WHETHER IN CONTRACT, TORT OR OTHER LEGAL THEORY. IN NO EVENT SHALL SELLER'S LIABILITY UNDER ANY CLAIM MADE BY BUYER EXCEED THE PURCHASE PRICE OF THE PRODUCTS.

**7. Contingencies.** Seller shall not be liable for any default or delay in performance if caused by circumstances beyond the reasonable control of Seller.

**8. User Responsibility.** The user, through its own analysis and testing, is solely responsible for making the final selection of the system and Product and assuring that all performance, endurance, maintenance, safety and warning requirements of the application are met. The user must analyze all aspects of the application and follow applicable industry standards and Product information. If Seller provides Product or system options, the user is responsible for determining that such data and specifications are suitable and sufficient for all applications and reasonably foreseeable uses of the Products or systems.

**9. Loss to Buyer's Property.** Any designs, tools, patterns, materials, drawings, confidential information or equipment furnished by Buyer or any other items which become Buyer's property, may be considered obsolete and may be destroyed by Seller after two consecutive years have elapsed without Buyer placing an order for the items which are manufactured using such property. Seller shall not be responsible for any loss or damage to such property while it is in Seller's possession or control.

**10. Special Tooling.** A tooling charge may be imposed for any special tooling, including without limitation, dies, fixtures, molds and patterns, acquired to manufacture Products.

Such special tooling shall be and remain Seller's property notwithstanding payment of any charges by Buyer. In no event will Buyer acquire any interest in apparatus belonging to Seller which is utilized in the manufacture of the Products, even if such apparatus has been specially converted or adapted for such manufacture and notwithstanding any charges paid by Buyer. Unless otherwise agreed, Seller shall have the right to alter, discard or otherwise dispose of any special tooling or other property in its sole discretion at any time.

**11. Buyer's Obligation; Rights of Seller.** To secure payment of all sums due or otherwise, Seller shall retain a security interest in the goods delivered and this agreement shall be deemed a Security Agreement under the Uniform Commercial Code. Buyer authorizes Seller as its attorney to execute and file on Buyer's behalf all documents Seller deems necessary to perfect its security interest. Seller shall have a security interest in, and lien upon, any property of Buyer in Seller's possession as security for the payment of any amounts owed to Seller by Buyer.

**12. Improper use and Indemnity.** Buyer shall indemnify, defend, and hold Seller harmless from any claim, liability, damages, lawsuits, and costs (including attorney fees), whether for personal injury, property damage, patent, trademark or copyright infringement or any other claim, brought by or incurred by Buyer, Buyer's employees, or any other person, arising out of: (a) improper selection, improper application or other misuse of Products purchased by Buyer from Seller; (b) any act or omission, negligent or otherwise, of Buyer; (c) Seller's use of patterns, plans, drawings, or specifications furnished by Buyer to manufacture Product; or (d) Buyer's failure to comply with these terms and conditions. Seller shall not indemnify Buyer under any circumstance except as otherwise provided.

**13. Cancellations and Changes.** Orders shall not be subject to cancellation or change by Buyer for any reason, except with Seller's written consent and upon terms that will indemnify, defend and hold Seller harmless against all direct, incidental and consequential loss or damage. Seller may change product features, specifications, designs and availability with notice to Buyer.

**14. Limitation on Assignment.** Buyer may not assign its rights or obligations under this agreement without the prior written consent of Seller.

**15. Entire Agreement.** This agreement contains the entire agreement between the Buyer and Seller and constitutes the final, complete and exclusive expression of the terms of the agreement. All prior or contemporaneous written or oral agreements or negotiations with respect to the subject matter are herein merged.

**16. Waiver and Severability.** Failure to enforce any provision of this agreement will not waive that provision nor will any such failure prejudice Seller's right to enforce that provision in the future. Invalidation of any provision of this agreement by legislation or other rule of law shall not invalidate any other provision herein. The remaining provisions of this agreement will remain in full force and effect.

**17. Termination.** This agreement may be terminated by Seller for any reason and at any time by giving Buyer thirty (30) days written notice of termination. In addition, Seller may

by written notice immediately terminate this agreement for the following: (a) Buyer commits a breach of any provision of this agreement (b) the appointment of a trustee, receiver or custodian for all or any part of Buyer's property (c) the filing of a petition for relief in bankruptcy of the other Party on its own behalf, or by a third party (d) an assignment for the benefit of creditors, or (e) the dissolution or liquidation of the Buyer.

**18. Governing Law.** This agreement and the sale and delivery of all Products hereunder shall be deemed to have taken place in and shall be governed and construed in accordance with the laws of the State of Ohio, as applicable to contracts executed and wholly performed therein and without regard to conflicts of laws principles. Buyer irrevocably agrees and consents to the exclusive jurisdiction and venue of the courts of Cuyahoga County, Ohio with respect to any dispute, controversy or claim arising out of or relating to this agreement. Disputes between the parties shall not be settled by arbitration unless, after a dispute has arisen, both parties expressly agree in writing to arbitrate the dispute.

**19. Indemnity for Infringement of Intellectual Property Rights.** Seller shall have no liability for infringement of any patents, trademarks, copyrights, trade dress, trade secrets or similar rights except as provided in this Section. Seller will defend and indemnify Buyer against allegations of infringement of U.S. patents, U.S. trademarks, copyrights, trade dress and trade secrets ("Intellectual Property Rights"). Seller will defend at its expense and will pay the cost of any settlement or damages awarded in an action brought against Buyer based on an allegation that a Product sold pursuant to this Agreement infringes the Intellectual Property Rights of a third party. Seller's obligation to defend and indemnify Buyer is contingent on Buyer notifying Seller within ten (10) days after Buyer becomes aware of such allegations of infringement, and Seller having sole control over the defense of any allegations or actions including all negotiations for settlement or compromise. If a Product is subject to a claim that it infringes the Intellectual Property Rights of a third party, Seller may, at its sole expense and option, procure for Buyer the right to continue using the Product, replace or modify the Product so as to make it noninfringing, or offer to accept return of the Product and return the purchase price less a reasonable allowance for depreciation. Notwithstanding the foregoing, Seller shall have no liability for claims of infringement based on information provided by Buyer, or directed to Products delivered hereunder for which the designs are specified in whole or part by Buyer, or infringements resulting from the modification, combination or use in a system of any Product sold hereunder. The foregoing provisions of this Section shall constitute Seller's sole and exclusive liability and Buyer's sole and exclusive remedy for infringement of Intellectual Property Rights.

**20. Taxes.** Unless otherwise indicated, all prices and charges are exclusive of excise, sales, use, property, occupational or like taxes which may be imposed by any taxing authority upon the manufacture, sale or delivery of Products.

**21. Equal Opportunity Clause.** For the performance of government contracts and where dollar value of the Products exceed \$10,000, the equal employment opportunity clauses in Executive Order 11246, VEVRAA, and 41 C.F.R. §§ 60-1.4(a), 60-741.5(a), and 60-250.4, are hereby incorporated.

# Parker's Motion & Control Technologies

At Parker, we're guided by a relentless drive to help our customers become more productive and achieve higher levels of profitability by engineering the best systems for their requirements. It means looking at customer applications from many angles to find new ways to create value. Whatever the motion and control technology need, Parker has the experience, breadth of product and global reach to consistently deliver. No company knows more about motion and control technology than Parker. For further info call 1-800-C-Parker.

## AEROSPACE

### Key Markets

- Aircraft engines
- Business & general aviation
- Commercial transports
- Land-based weapons systems
- Military aircraft
- Missiles & launch vehicles
- Regional transports
- Unmanned aerial vehicles

### Key Products

- Flight control systems & components
- Fluid conveyance systems
- Fluid metering delivery & atomization devices
- Fuel systems & components
- Hydraulic systems & components
- Inert nitrogen generating systems
- Pneumatic systems & components
- Wheels & brakes

## CLIMATE CONTROL

### Key Markets

- Agriculture
- Air conditioning
- Food, beverage & dairy
- Life sciences & medical
- Precision cooling
- Processing
- Transportation

### Key Products

- CO<sub>2</sub> controls
- Electronic controllers
- Filter driers
- Hand shut-off valves
- Hose & fittings
- Pressure regulating valves
- Refrigerant distributors
- Safety relief valves
- Solenoid valves
- Thermostatic expansion valves

## ELECTROMECHANICAL

### Key Markets

- Aerospace
- Factory automation
- Life science & medical
- Machine tools
- Packaging machinery
- Paper machinery
- Plastics machinery & converting
- Primary metals
- Semiconductor & electronics
- Textile
- Wire & cable

### Key Products

- AC/DC drives & systems
- Electric actuators, gantry robots & slides
- Electrohydraulic actuation systems
- Electromechanical actuation systems
- Human machine interface
- Linear motors
- Stepper motors, servo motors, drives & controls
- Structural extrusions

## FILTRATION

### Key Markets

- Food & beverage
- Industrial machinery
- Life sciences
- Marine
- Mobile equipment
- Oil & gas
- Power generation
- Process
- Transportation

### Key Products

- Analytical gas generators
- Compressed air & gas filters
- Condition monitoring
- Engine air, fuel & oil filtration & systems
- Hydraulic, lubrication & coolant filters
- Process, chemical, water & microfiltration filters
- Nitrogen, hydrogen & zero air generators

## FLUID & GAS HANDLING

### Key Markets

- Aerospace
- Agriculture
- Bulk chemical handling
- Construction machinery
- Food & beverage
- Fuel & gas delivery
- Industrial machinery
- Mobile
- Oil & gas
- Transportation
- Welding

### Key Products

- Brass fittings & valves
- Diagnostic equipment
- Fluid conveyance systems
- Industrial hose
- PTFE & PFA hose, tubing & plastic fittings
- Rubber & thermoplastic hose & couplings
- Tube fittings & adapters
- Quick disconnects

## HYDRAULICS

### Key Markets

- Aerospace
- Aerial lift
- Agriculture
- Construction machinery
- Forestry
- Industrial machinery
- Mining
- Oil & gas
- Power generation & energy
- Truck hydraulics

### Key Products

- Diagnostic equipment
- Hydraulic cylinders & accumulators
- Hydraulic motors & pumps
- Hydraulic systems
- Hydraulic valves & controls
- Power take-offs
- Rubber & thermoplastic hose & couplings
- Tube fittings & adapters
- Quick disconnects

## PNEUMATICS

### Key Markets

- Aerospace
- Conveyor & material handling
- Factory automation
- Life science & medical
- Machine tools
- Packaging machinery
- Transportation & automotive

### Key Products

- Air preparation
- Brass fittings & valves
- Manifolds
- Pneumatic accessories
- Pneumatic actuators & grippers
- Pneumatic valves & controls
- Quick disconnects
- Rotary actuators
- Rubber & thermoplastic hose & couplings
- Structural extrusions
- Thermoplastic tubing & fittings
- Vacuum generators, cups & sensors

## PROCESS CONTROL

### Key Markets

- Chemical & refining
- Food, beverage & dairy
- Medical & dental
- Microelectronics
- Oil & gas
- Power generation

### Key Products

- Analytical sample conditioning products & systems
- Fluoropolymer chemical delivery fittings, valves & pumps
- High purity gas delivery fittings, valves & regulators
- Instrumentation fittings, valves & regulators
- Medium pressure fittings & valves
- Process control manifolds

## SEALING & SHIELDING

### Key Markets

- Aerospace
- Chemical processing
- Consumer
- Energy, oil & gas
- Fluid power
- General industrial
- Information technology
- Life sciences
- Military
- Semiconductor
- Telecommunications
- Transportation

### Key Products

- Dynamic seals
- Elastomeric o-rings
- EMI shielding
- Extruded & precision-cut, fabricated elastomeric seals
- Homogeneous & inserted elastomeric shapes
- High temperature metal seals
- Metal & plastic retained composite seals
- Thermal management

ENGINEERING YOUR SUCCESS.
